Volume 46 (1988)

No. 1

Publisher's Note v

T.I. Lotta, L.H. Laakkonen, J.A. Virtanen and P.K.J. Kinnunen, *Characterization of Langmuir-Blodgett films of 1,2-dipalmitoyl-sn-glycero-3-phosphatidylcholine and 1-palmitoyl-2-[10-(pyren-1-yl)decanoyl]-sn-glycerol-3-phosphatidylcholine by FTIR-ATR* 1

T.I. Lotta, J.A. Virtanen and P.K.J. Kinnunen, *Fourier transform infrared study on the thermotropic behaviour of fully hydrated 1-palmitoyl-2-[10-(pyren-1-yl)-decanoyl]-sn-glycero-3-phosphatidylcholine* 13

T. Inoue, T. Iwanaga, K. Fukushima and R. Shimozawa, *Effect of sodium octanoate and sodium perfluorooctanoate on gel-to-liquid-crystalline phase transition of dipalmitoylphosphatidylcholine vesicle membrane* 25

K. Mukai, K. Fukuda and K. Ishizu, *Stopped-flow investigation of antioxidant activity of tocopherols. Finding of new tocopherol derivatives having higher antioxidant activity than α-tocopherol* 31

R.M. Servuss, *Helical ribbons of lecithin* 37

S. Akoka, C. Tellier, C. Le Roux and D. Marion, *A phosphorus magnetic resonance spectroscopy and a differential scanning calorimetry study of the physical properties of N-acylphosphatidylethanolamines in aqueous dispersions* 43

A. Mellier and A. Diaf, *Infrared study of phospholipid hydration. Main phase transition of saturated phosphatidylcholine/water multilamellar samples* 51

L. Lebeau, C. Mioskowski and P. Oudet, *Synthesis of phospholipids linked to steroid hormone derivatives* 57

J.B. Finean and A.L. Hutchinson, *X-ray diffraction studies of lipid phase transitions in cholesterol-rich membranes at sub-zero temperatures* 63

Short Communication

J. Zingoni, A. Chauhan, V.P.S. Chauhan and H. Brockerhoff, *Preparation of passive bilayer liposomes* 73

No. 2

D.J. Siminovitch, P.T.T. Wong, R. Berchtold and H.H. Mantsch, *A comparison of the effect of one and two mono-unsaturated acyl chains on the structure of phospholipid bilayers: a high pressure infrared spectroscopic study* 79

P. Viani, C. Galimberti, S. Marchesini, G. Cervato and B. Cestaro, *N-Pyrene dodecenoyl sulfatide as membrane probe: a study of glycolipid dynamic behavior in model membranes* 89

G. Pifat, L. Udovičić, J. Brnjas-Kralvejić, G. Jürgens, A. Holasek and J.N. Herak, *Competitive ion binding to low density lipoproteins: an electron spin resonance study* 99

T. Inoue, Y. Muraoka, K. Fukushima and R. Shimozawa, *Interaction of surfactants with vesicle membrane of dipalmitoylphosphatidylcholine: fluorescence depolarization study* 107

R.A. Stein and J.F. Mean, *Small hydrocarbons formed by the peroxidation of squalene* 117

J. Calderón and P. Yagüe, *Phosphoric acid derivatives. XVI. Phosphatidylglycerols from diacylglycerol (o-acetoxyphenyl hydrogen phosphates)* 121
W.W. Christie, E.Y. Brechany and K. Stefanov, *Silver ion high-performance liquid chromatography and gas chromatography — mass spectrometry in the analysis of complex fatty acid mixtures: application to marine invertebrates* 127
B. Maggio, G.G. Montich and F.A. Çumar, *Surface topography of sulfatide and gangliosides in unilamellar vesicles of dipalmitoylphosphatidylcholine* 137
G.J. Schroepfer Jr., E.J. Parish and A.A. Kandutsch, *Inhibitors of sterol biosynthesis. Synthesis and activities of ring C oxygenated sterols* 147

Announcement 155

No. 3

P.N. Barlow, J.-C. Vidal, M.D. Lister, A.J. Hancock and P.B. Sigler (Chicago, IL, La Jolla, CA and Kansas City, MO), *Synthesis and some properties of constrained short-chain phosphatidylcholine analogues: (+)- and (−)-(1,3/2)-1-O-(phosphocholine)-2,3-0-dihexanoylcyclopentane-1,2,3-triol* 157
P.C. Schmid, S.B. Johnson and H.H.O. Schmid (Austin, MN), *Determination of ester carbonyl $^{16}O/^{18}O$ ratios in phospholipids by gas chromatography-mass spectrometry* 165
P. Yager, R.R. Price, J.M. Schnur, P.E. Schoen, A. Singh and D.G. Rhodes (Washington, DC, Suitland, MD and Farmington, CT), *The mechanism of formation of lipid tubules from liposomes* 171
S. Sonnino, D. Acquotti, G. Fronza, L. Cantù, V. Chigorno, M. Pitto, G. Kirschner and G. Tettamanti (Milan and Abano Terme, Italy), *Semisynthetic preparation of N-glycolylneuramininic acid containing GM1 ganglioside: chemical characterization, physicochemical properties and some biochemical features* 181
M.S.F. Lie Ken Jie and Y.F. Zheng (Hong Kong), *Synthesis of 2,2′-oxirane fatty esters and a study of some of their physical properties.* 193
S.D. Stamatov, V.K. Staneva and S.A. Ivanov (Plovdiv, Bulgaria), *Synthesis of 1-O-acylethane-2-O-amidothionphosphates and their R,S-α-tocopherol derivatives as a new model type of phospholipids* 199
B.A. Cunningham, E. Gelerinter and L.J. Lis (Kent, OH), *Monovalent ion-phosphatidylcholine interactions: an electron paramagnetic resonance study* 205
P.T.T. Wong and H.H. Mantsch (Ottawa, Canada), *High-pressure infrared spectroscopic evidence of water binding sites in 1,2-diacyl phospholipids* 213
W.W. Christie, E.Y. Brechany and M.S.F. Lie Ken Jie (Ayr, Scotland and Hong Kong), *Mass spectra of the picolinyl ester derivatives of some isomeric dimethylene-interrupted octadecadiynoic acids* 225

Short Communication
H.K. Mangold and Y. Yamada (Piusallee, F.R.G.), *Synthesis of unsaturated long-chain thioethers of thioglycerol* 231

Announcement 233

No. 4

M. Hamberg (Stockholm, Sweden), *Fatty acid allene oxides II. Formation of two macrolactones from 12,13-(S)-epoxy-9(Z),11-octadecadienoic acid* 235
S.T. Bowen, E.J. Parish, W.K. Wilson, G.J. Schroepfer, Jr. and F.A. Quiocho (Houston, TX), *Inhibitors of sterol synthesis. Concerning the structure of 15β-methyl-5α,14β-cholest-7-ene-3β,15α-diol, an inhibitor of cholesterol biosynthesis* 245

M.C. Moschidis (Athens, Greece), *Synthesis of a phosphono analogue of cardiolipin and study of its silicic acid column chromatographic behaviour* 253
A. Ortiz, J.C. Gomez-Fernandez (Murcia, Spain), *Calcium-induced aggregation of phosphatidylcholine vesicles containing free oleic acid* 259
D.A. Pink, D.M. Chisholm and D. Chapman (Antigonish, Canada and London, U.K.), *Models of protein lateral arrangements in lipid bilayer membranes. Application to electron spin resonance studies of cytochrome c oxidase* 267
D. Lichtenberg, N. Younis, A. Bor, T. Kushnir, M. Shefi, S. Almog and S. Nir (Tel Aviv, Tel Hashomer and Rehovot, Israel), *On the solubility of calcium deoxycholate: kinetics of precipitation and the effect of conjugated bile salts and lecithin* 279
